

Reject petition 04-160 as we are paying for a service which does not interfere with local stations. I use XM to hear about cities which I'm visiting but do not use it for local news which obviously can only be found locally. The music stations enable me to hear my own types of music in a city, Detroit, which does not have any stations which I accustomed to coming from Boulder

I will know who votes for what and will not re-elect any Congressman or Senator who would support this or suggest that the FCC does so.
